WORKFORCE EFFICIENCY

- The employee-to-sales ratio shows 1 sale per employee, which is extremely low efficiency, suggesting overstaffing or underperformance.
- Optimising workforce size is required

BUSINESS RECOMMENDATIONS

– Improve Employee Productivity:

- Review staffing levels → too many employees for the current sales volume.
- Set sales/efficiency targets per role (Barista, Waiter, Manager).

– Boost Sales:

- Seasonal promotions.

BUSINESS RECOMMENDATIONS

- Launch holiday bundles in December.
- Customer Targeting:
 - Focused promotions; expand Male engagement.
 - Cross-sell via product bundles.
- Customer Experience:
 - Investigate 1★–2★ reviews.
 - Enhance service quality to raise ratings above 4.0.

CONCLUSION

- With strong customer demand and dedicated employees as its foundation, Café Harmony's future success depends on three pillars: optimising staff efficiency, securing reliable inventory, and elevating customer experience. By addressing these KPIs — raising service ratings above 4.0★, reducing stockouts by 30%, and improving sales efficiency by 20% — Café Harmony will be positioned for sustainable growth and lasting competitive advantage.
